

What they're saying...

I've been to many different institutes nevertheless Regenerative institute of Newport is the best out there the moment you step in you immediately feel the warmth greeted by extremely friendly staff and more importantly the professional physicians and environment my son was treated there as well and had the same experience. I used to look forward to my next appointment I highly recommend it.

Jennifer D. MPA, MSW, LCSW

Advanced Medical Care for Injury Recovery & Legal Support

We provide comprehensive treatment options for patients recovering from injuries due to accidents, work-related incidents, or chronic conditions. Led by Dr. Khyber Zaffarkhan, our expert team offers both surgical & non-surgical solutions tailored to each patient's unique needs.

Working closely with attorneys to ensure clients receive the best possible care, while supporting their legal cases with detailed medical documentation & expert testimony.

Why Patients & Attorneys Trust Us

- **Efficient & Transparent Legal Coordination**

Same-Day Reports support timely settlements and facilitate essential medical treatment.

Timely Billing and Scheduling keep law firms informed and ensure smooth case management.

Policy Limit Awareness ensures fair reimbursement for all providers.

- **Punctuality & Patient Experience**

- **State-of-the-Art Facility**

We combine medical excellence with seamless legal coordination to deliver the best outcomes for both patients & attorneys.

ADVANCED MEDICAL CARE
FOR INJURY RECOVERY
& LEGAL SUPPORT

Legal Services for Injury Cases

Our expertise extends beyond treatment—we partner with attorneys to provide thorough medical documentation, expert evaluations, and patient advocacy.

Treatment on Lien

We ensure that injured clients receive **immediate, high-quality medical care** without out-of-pocket expenses. Our lien-based treatment structure allows attorneys to focus on their cases while we focus on recovery.

Life Care Planning

For severe injuries or long-term disabilities, we provide **comprehensive life care plans** outlining future medical needs, costs, and rehabilitation. These reports are crucial in personal injury & workers' compensation cases.

Independent Medical Exams (IME) & Record Review

We provide **detailed, objective medical evaluations** for attorneys handling complex cases. Whether confirming diagnoses, assessing treatment plans, or reviewing medical records, our expert opinions help build **strong legal cases**.

Board-Certified Pain Management Specialist

Dr. Khyber Zaffarkhan, DO, FAAPMR, is a board-certified pain management specialist and founder of the Regenerative Institute. With extensive training from UCLA, Tufts, and the University of Chicago, he offers cutting-edge surgical & non-surgical treatments for pain relief. Beyond medicine, Dr. Z is an FAA-licensed pilot & enjoys surfing, golf, and community advocacy.

DR. KHYBER ZAFFARKHAN, DO, FAAPMR

Innovative Treatment Options for Pain & Recovery

• Percutaneous Discectomy

A minimally invasive procedure to remove herniated disc material that presses on the spinal nerves, reducing pain & restoring movement. Unlike traditional open surgery, this technique allows for **faster recovery with minimal scarring**.

Worked with them to deal with chronic pain following a car accident, and I am very happy I was referred to them. They were kind & effective.

— DRAGOR C.

• Botox for Pain Management

Beyond cosmetic applications, **Botox injections** are a proven medical treatment for migraines, muscle spasms, and chronic pain conditions. By relaxing overactive muscles, Botox helps relieve tension headaches, TMJ disorders, and nerve pain.

• PRP (Platelet-Rich Plasma) Injections

PRP therapy uses a patient's own platelets, rich in growth factors, to accelerate the healing of soft tissue injuries, muscle strains, and joint damage. This treatment is widely used for conditions such as **tendonitis, ligament injuries, and post-surgical healing**.

- Spinal Cord Stimulator
- Minimally Invasive Lumbar Decompression (MILD Procedure)
- Epidural Steroid Injections
- Ketamine Infusions
- Stem Cell Therapy
- Radiofrequency Ablation (RFA)

Conditions We Treat

- Neck & Back Pain
- Complex Regional Pain Syndrome (CRPS)
- Shoulder Pain
- Knee Pain
- Hip Pain
