

## What they're saying...

*I've been to many different institutes nevertheless Regenerative institute of Newport is the best out there the moment you step in you immediately feel the warmth greeted by extremely friendly staff and more importantly the professional physicians and environment my son was treated there as well and had the same experience. I used to look forward to my next appointment I highly recommend it.*

Jennifer D. MPA, MSW, LCSW

## Advanced Medical Care for Pain Management

We specialize in helping you recover from injuries—whether from an accident, work-related strain, or chronic pain. Under the care of Dr. Khyber Zaffarkhan and our experienced medical team, you'll receive a personalized treatment plan designed to relieve pain, restore mobility, and support long-term healing.

We offer both surgical and non-surgical options, including advanced regenerative therapies, physical medicine, and pain management—customized to your specific needs and lifestyle.

### Why Patients Trust Us

#### • Punctuality & Patient Experience

Appointments start on time, with extended visits for in-depth evaluations and custom treatment plans. Our clean, professional setting enhances comfort and patient confidence.

#### • State-of-the-Art Facility

With advanced imaging, surgical suites, and therapy options, our state-of-the-art center supports precise, effective care. Real-time C-arm imaging ensures safety and tailored recovery solutions.

ADVANCED MEDICAL CARE  
FOR PAIN MANAGEMENT

## What You Can Expect

**Compassionate Care:** We listen closely, treat you with respect, and guide you every step of the way.

**Comprehensive Treatment:** From diagnostics to recovery, all services are under one roof.

**Personalized Plans:** Your treatment is tailored to your body, goals, and level of injury.

**Clear Communication:** We keep you informed, help you understand your options, and answer your questions thoroughly.

**Convenient Support:** We assist with scheduling, insurance, and paperwork to help make your recovery process smoother and easier.

## Meet your Team

Dr. Khyber Zaffarkhan, DO, FAAPMR, is a board-certified pain management specialist and founder of the Regenerative Institute. With extensive training from UCLA, Tufts, and the University of Chicago, he offers cutting-edge surgical & non-surgical treatments for pain relief. Beyond medicine, Dr. Z is an FAA-licensed pilot & enjoys surfing, golf, and community advocacy.

DR. KHYBER ZAFFARKHAN, DO, FAAPMR

Paul brings broad experience in orthopedic surgery, emergency medicine, and pain management. A California native, he earned his Bachelor's at Biola University and Master's from USC's Keck School of Medicine. He's committed to helping patients understand their care plans. Outside work, Paul enjoys hiking with family and cheering on the Los Angeles Angels.

PAUL P. SCHOERNER, MPAP, PA-C

D'Andra Lee is a board-certified family nurse practitioner recognized by the American Association of Nurse Practitioners. With a background in neuro-trauma nursing, she specializes in pain management, rehabilitation, and regenerative medicine, helping patients restore mobility and improve quality of life through personalized, compassionate care.

D'ANDRA LEE, MSN, FNP-C

## Innovative Treatment Options for Pain & Recovery

- **Stem Cell Therapy**  
Stem cell therapy harnesses the body's natural regenerative abilities to repair damaged tissues, reduce inflammation, and promote healing. Using a patient's own stem cells or advanced biologic injections, this treatment can help recover joint function, restore mobility, and decrease chronic pain.
- **Botox for Pain Management**  
Beyond cosmetic applications, **Botox injections** are a proven medical treatment for **migraines, muscle spasms, and chronic pain conditions**. By relaxing overactive muscles, Botox helps relieve tension headaches, TMJ disorders, and nerve pain.
- **PRP (Platelet-Rich Plasma) Injections**  
PRP therapy uses a patient's own platelets, rich in growth factors, to accelerate the healing of soft tissue injuries, muscle strains, and joint damage. This treatment is widely used for conditions such as **tendonitis, ligament injuries, and post-surgical healing**.
- **Ketamine Infusions**
- **Radiofrequency Ablation (RFA)**
- **Minimally Invasive Lumbar Decompression (MILD Procedure)**
- **Percutaneous Discectomy**
- **Epidural Steroid Injections**

## Conditions We Treat

### Neck & Back Pain

From herniated discs, spinal stenosis, and post-injury pain to conditions like Sciatica.

### Complex Regional Pain Syndrome (CRPS)

Managing one of the most severe chronic pain conditions with advanced treatments.

### Shoulder Pain

Rotator cuff injuries, arthritis, and tendonitis relief.

### Knee Pain

Joint degeneration, ligament damage, and post-surgical care.

### Hip Pain

Addressing mobility issues & joint injuries from trauma or aging.

*Worked with them to deal with chronic pain following a car accident, and I am very happy I was referred to them. They were kind & effective.*
